PROFESSIONAL PROFILE

A motivated and enthusiastic junior full-stack developer with a strong interest in software engineering. Currently completing the intensive YouthCode programme at Life Choices Academy, where I am developing technical proficiency in HTML, CSS, JavaScript, and Node.js alongside professional skills through real-world projects and collaborative teamwork. A quick learner and adaptive problem-solver who thrives in agile environments and is eager to contribute to a dynamic development team.

CORE SKILLS

Time Management
Communication
Teamwork
Critical Thinking
Digital Tools Proficiency
Data Handling
Problem Solving
Adaptability

EDUCATION & TRAINING

Youthforce Salesforce Certification Programme
Life Choices Academy | August 2024 – Present

A four-phase workforce development programme designed to prepare young professionals for roles in the Salesforce ecosystem. The programme includes technical certifications, real-world experience, and personal development.

Key Achievements:

- Youth Code Graduate: Successfully completed the rigorous Youth Code Software Development curriculum, logging over 130+ practical technical training hours per participant.
- Completed Youth Code Software Development

National Senior Certificate (Matric)

Oaklands Secondary School, Cape Town | January 2021 – December 2025

- Completed Grade 12 with a focus on commercial and scientific disciplines.
- Subjects: English Home Language, isiXhosa, Mathematics, Life Orientation, Accounting, Life Sciences, and Physical Sciences.
- Academic Project: Collaborated in a team to research, develop, and present a viable business model to the class, developing foundational presentation and market research skills.

SHORT COURSES & CERTIFICATIONS

Introduction to Data Science

CISCIO Networking Academy | 2026

- Developed foundational knowledge in data analysis, data extraction, and statistical thinking to support data-driven decision-making.

Introduction to Cybersecurity

Cisco Networking Academy | 2026

- Gained foundational knowledge in threat landscapes, vulnerability assessment, and digital asset protection.
- Developed a strong understanding of confidentiality, integrity, and availability (CIA triad) principles to support secure business operations.

PROJECT EXPERIENCE

Modern Tech – Human Resources Management Web Application
Personal/Team Project | 2026

- Contributed to the development of a human resources management web application with separate HR and employee functionality.
- Worked with JavaScript, Node.js, Express.js, and MySQL to support backend functionality and database integration.
- Worked on user authentication, including password verification and role-specific login functionality.
- Contributed to calendar functionality and API integration to support HR workflows.
- Used Git and GitHub for version control and collaborative development.
- Tested and debugged application functionality to identify and resolve issues.

Lightning News – Web Scraping and Analytics Dashboard
Team Charlie | Four-week Capstone Project | 2026

- Contributed to the development of a web scraping and analytics dashboard for collecting and exploring news articles from online sources.
- Used Python and BeautifulSoup to extract and parse article information from news websites.
- Worked with Flask to support backend functionality and Vue.js to build the user interface.
- Contributed to search, filtering, and data export functionality to help users explore collected articles.
- Collaborated with a team using Git, GitHub, and Agile/Scrum practices throughout the project.

WeConnect – E-Commerce Web Application
Team Project | 2026

- Contributed to the development of an e-commerce platform connecting buyers and suppliers.
- Developed frontend pages and reusable Vue.js components, including sidebar navigation.
- Worked with Node.js and Express.js to implement API routes and controllers.
- Designed and managed MySQL database structures and queries to support application functionality.
- Assisted with database integration, including connecting to an Aiven-hosted MySQL database and configuring deployment settings.
- Contributed to the supplier-facing functionality and styling of the buyer-side shop section.
- Collaborated with team members using Git and GitHub, testing and debugging features throughout development.

WORK EXPERIENCE

Salesforce Intern / Trainee Specialist

LC Studio (Life Choices Academy), Cape Town | July 2026 – Present

- Managing end-to-end Salesforce platform administration tasks based on real-world business requirements and user requests.
- Designing and implementing cloud configurations, user permissions, and custom workflows to optimize simulated and client-facing business processes.
- Collaborating actively within an agile project team, contributing to group targets including the collective completion of over 2,400 Trailhead badges and 183 Superbadges.
- Demonstrated strong transferable skills in technical problem-solving, professional communication, and strict project punctuality within a structured corporate environment.
